

EDUSAMBAM ASSESSMENT SERIES

Number Line Skills

PRINTABLE PRACTICE WORKSHEET

EDUSAMBAM, working on building your Foundational Concepts. Visit edusambam.com for Auto-graded Self-assessment Experience.

YOUR PHYSICAL & ONLINE SELF-ASSESSMENT ROADMAP

Candidate Name:		Roll No.:	
Class / Grade:		Date:	
School / Institution:		Test Centre:	

Subject	Mathematics (Maths)	Topic	Number Line Skills	Total Marks	100
Total Questions	45	Time Allowed	1 Hour (60 minutes)	Version	A

GENERAL INSTRUCTIONS

- Read each question carefully before answering.
- For Section A and Section B, mark one answer only.
- For Sections C and E, write your answer clearly in the space provided.
- For Section D, write the correct letter from Column B against each item in Column A.
- Do not use correction fluid. Keep all answers clear and legible.
- This worksheet is prepared from the EDUSAMBAM practice assessment supplied for this paper.

PAPER PATTERN

Section	Questions	Marks Each	Total
Section A — Multiple Choice	15	2	30
Section B — True / False	10	2	20
Section C — Fill in the Blank	10	2	20
Section D — Column Matching	5 pairs	2	10
Section E — Short Answer	5	4	20
Total	45	—	100

Section A — Multiple Choice

30 marks

1. A number line is used to:

A. Show numbers in order along a straight line

B. Store passwords

C. Draw pictures only

D. Replace a calculator entirely

Answer: ☐A ☐B ☐C ☐D

Basic • 2 pts

2. On a standard number line, numbers increase in value as you move:

A. To the left

B. To the right

C. Upward only

D. Downward only

Answer: ☐A ☐B ☐C ☐D

Basic • 2 pts

3. Where would you place the fraction 1/2 on a number line from 0 to 1?

A. At 0

B. Exactly halfway between 0 and 1

C. At 1

D. Outside the line

Answer: ☐A ☐B ☐C ☐D

Basic • 2 pts

4. Where would you place the decimal 0.5 on a number line from 0 to 1?

A. At the same point as 1/2

B. At 0

C. At 1

D. Nowhere on the line

Answer: ☐A ☐B ☐C ☐D

Basic • 2 pts

5. On a number line, adding a positive number means moving:

A. To the right

B. To the left

C. Off the line

D. Nowhere

Answer: ☐A ☐B ☐C ☐D

Intermediate • 2 pts

6. On a number line, subtracting a positive number means moving:

A. To the right

B. To the left

C. Upward

D. Downward

Answer: ☐A ☐B ☐C ☐D

7. If you start at 3 and add 4 on a number line, you land on:

A. 7

B. -1

C. 12

D. 3

Answer: ☐A ☐B ☐C ☐D

8. If you start at 5 and subtract 8 on a number line, you land on:

A. 13

B. 3

C. -3

D. 40

Answer: ☐A ☐B ☐C ☐D

9. Multiplication on a number line can be shown as:

A. Repeated jumps of equal size

B. A single random jump

C. Erasing the number line

D. Only subtraction

Answer: ☐A ☐B ☐C ☐D

10. If you make 3 jumps of size 4 starting at 0 on a number line, you land on:

A. 7

B. 12

C. 1

D. 34

Answer: ☐A ☐B ☐C ☐D

11. Division on a number line can be shown as:

A. Splitting a distance into equal-sized jumps

B. Making the line longer

C. Random jumps of different sizes

D. Ignoring the starting point

Answer: ☐A ☐B ☐C ☐D

12. If you divide the distance from 0 to 12 into equal jumps of 3, how many jumps are there?

A. 3

B. 4

C. 12

D. 36

Answer: ☐A ☐B ☐C ☐D

13. On a number line, zero is located:

A. At the far right end always

B. At the point separating positive and negative numbers

C. At the far left end always

D. Nowhere; it is not shown

Answer: ☐A ☐B ☐C ☐D

14. Negative numbers on a standard number line are found:

A. To the left of zero

B. To the right of zero

C. Above zero

D. Below zero

Answer: ☐A ☐B ☐C ☐D

15. A number line can help visually compare the size of:

A. Whole numbers, fractions, and decimals

B. Only colors

C. Only shapes

D. Nothing numerical

Answer: ☐A ☐B ☐C ☐D

Section B — True / False

20 marks

16. On a standard number line, numbers increase in value moving to the right.

A. True ☐

B. False ☐

17. Fractions and decimals can both be placed on the same number line.

A. True ☐

B. False ☐

18. Adding a positive number on a number line means moving to the left.

A. True ☐

B. False ☐

19. Subtracting a positive number on a number line means moving to the left.

A. True ☐

B. False ☐

20. Multiplication can be shown on a number line using repeated equal jumps.

A. True ☐

B. False ☐

21. Division on a number line involves splitting a distance into equal parts.

A. True ☐

B. False ☐

22. Negative numbers appear to the right of zero on a standard number line.
A. True ☐ **B.** False ☐

23. Zero separates positive numbers from negative numbers on a number line.
A. True ☐ **B.** False ☐

24. A number line can only show whole numbers, never fractions or decimals.
A. True ☐ **B.** False ☐

25. Number lines help visually compare the relative size of different numbers.
A. True ☐ **B.** False ☐

Section C — Fill in the Blank

20 marks

26. A straight line used to show numbers in order is called a ____ line.
Answer: _____

27. On a standard number line, moving to the right means the numbers _____.
Answer: _____

28. On a standard number line, moving to the left means the numbers _____.
Answer: _____

29. Adding a positive number on a number line means moving to the _____.
Answer: _____

30. Subtracting a positive number on a number line means moving to the _____.
Answer: _____

31. Multiplication on a number line can be represented using repeated equal _____.
Answer: _____

32. Division on a number line involves splitting a distance into equal _____.
Answer: _____

33. Numbers less than zero are called ____ numbers and appear to the left of zero.
Answer: _____

34. The point that separates positive numbers from negative numbers on a number line is _____.
Answer: _____

35. A number line makes it easier to visually ____ the size of different numbers.
Answer: _____

Section D — Column Matching

10 marks

36-40. Match each term to its correct definition.

Column A	Answer	Column B
Addition	_____	A. Making repeated equal-sized jumps
Subtraction	_____	B. Splitting a distance into equal-sized parts
Multiplication	_____	C. The point separating positive and negative numbers
Division	_____	D. Moving to the right by a certain amount
Zero	_____	E. Moving to the left by a certain amount

Section E — Short Answer

20 marks

41. How would you show $4 + 3$ using a number line?

42. How would you show $9 - 5$ using a number line?

Advanced • 4 pts

Advanced • 4 pts

43. Explain how multiplication can be represented as repeated jumps on a number line.

Advanced · 4 pts

44. Explain how division can be represented on a number line.

Advanced · 4 pts

45. Why is a number line a useful tool for comparing fractions and decimals?

Advanced · 4 pts

EDUSAMBAM ASSESSMENT SERIES

Number Line Skills — Answer Key

Teacher reference: equivalent grammatically correct wording is acceptable for open-ended items when the meaning is preserved.

Section A — Multiple Choice

- | | |
|------|-------|
| 1. A | 9. A |
| 2. B | 10. B |
| 3. B | 11. A |
| 4. A | 12. B |
| 5. A | 13. B |
| 6. B | 14. A |
| 7. A | 15. A |
| 8. C | |

Section B — True / False

- | | |
|-----------|-----------|
| 16. True | 21. True |
| 17. True | 22. False |
| 18. False | 23. True |
| 19. True | 24. False |
| 20. True | 25. True |

Section C — Fill in the Blank

- | | |
|--------------|--------------|
| 26. number | 31. jumps |
| 27. increase | 32. parts |
| 28. decrease | 33. negative |
| 29. right | 34. zero |
| 30. left | 35. compare |

Section D — Column Matching

- | | |
|------------------------|------------------|
| 36. Addition — D | 39. Division — B |
| 37. Subtraction — E | 40. Zero — C |
| 38. Multiplication — A | |

Section E — Short Answer (Model Answers)

- 41.** start; move; right; jump; 4
- 42.** start; move; left; jump; 9
- 43.** repeat; equal; jump; multiply
- 44.** split; equal; part; divide
- 45.** visual; compare; position; size; order
